

MINDOW WEBSITE

Website Structure & Design Direction

1. BRAND

Brand Name:

MINDOW

Primary Tagline:

CURIOSITY. EXPRESSION. EXPERIENCE.

Core Positioning:

Mindow is an AI-powered self-expression and experiential learning platform where curiosity becomes expression, expression becomes experience, and experience becomes growth.

Important:

Mindow should NOT look like:

- Conventional EdTech
- LMS
- Student portfolio
- AI tutoring platform
- School administration software

The website should feel:

- Intelligent
- Creative
- Human
- Curious
- Experimental
- Future-facing
- Premium
- Interactive

2. HEADER / MAIN NAVIGATION

Header

Left:

MINDOW Logo

Center / Main Navigation:

1. **Home**

2. **Why Mindow**
3. **How It Works**
4. **Explore Mindow**
5. **For Schools**
6. **About**
7. **Insights**

Right:

Login

Experience Mindow — Primary CTA

3. NAVIGATION DROPDOWN STRUCTURE

WHY MINDOW

Dropdown:

- The Problem
 - Learning Starts With Curiosity
 - From Face to Mind
 - Mode of Expression, Redefined
 - Mindow Philosophy
-

HOW IT WORKS

Dropdown:

- Scribble
 - Shelf
 - Intent Interface
 - Intent Interactive Scribble
 - Scribble Chain
 - Experiential Learning
 - Mentor ↔ Student
 - AI Understanding
-

EXPLORE MINDOW

Dropdown:

- Scribble
 - Shelf
 - Scribble Chain
 - Social Wall
 - Learning Journey
 - Mindow Learning Loop
-

FOR SCHOOLS

Dropdown:

- For Schools
 - For Teachers & Mentors
 - Student Experience
 - Experiential Learning
 - Safety & Responsible AI
 - NEP-Aligned Learning
-

ABOUT

Dropdown:

- About Mindow
 - Vision
 - Philosophy
 - The Future of Digital Identity
 - Contact
-

4. HOME PAGE

The homepage should tell the complete Mindow story without feeling like a long corporate website.

SECTION 01 — HERO

Headline:

What if your mind could become your identity?

Subheadline:

Mindow is an AI-powered self-expression and experiential learning platform where curiosity becomes expression, expression becomes experience, and experience becomes growth.

Supporting line:

Every mind thinks differently.

Every person expresses differently.

Mindow creates an environment where thoughts, ideas, choices and experiences can become part of an evolving learning journey.

CTA:

Explore Mindow

Secondary CTA:

See How It Works

Hero Visual:

Interactive profile transformation:

Profile Picture → Curiosities → Ideas → Scribbles → Shelf → Experiences → Projects → Perspectives

End with:

Not just how I look.

How I think, create, choose and experience.

SECTION 02 — THE BIG IDEA

Headline:

**From displaying the face
to displaying the mind.**

Explain the evolution of digital identity.

Visual should show:

FACE

INTERESTS

IDEAS

CREATIONS

EXPERIENCES

EVOLVING IDENTITY

This is a FUTURE VISION.

Do not present it as psychological profiling.

SECTION 03 — WHY MINDOW

Headline:

Learning starts with curiosity.

Show:

CURIOUS

EXPRESS

EXPLORE

EXPERIENCE

Short explanation:

Traditional education often begins with what a student should learn.

Mindow begins with:

What is this student curious to discover?

SECTION 04 — WHAT IS MINDOW?

Headline:

A new interface between curiosity, expression and experience.

Show three major pillars:

CURIOSITY

EXPRESSION

EXPERIENCE

Explain that Mindow combines:

- Self-expression

- AI-supported understanding
 - Experiential learning
 - Mentor–student interaction
-

SECTION 05 — PRODUCT INTRODUCTION

This should be a highly visual interactive section.

Introduce the core Mindow ecosystem:

SCRIBBLE

How I think & create

SHELF

What I choose & explore

INTENT

What I want to communicate

EXPERIENCE

What I do with it

SCRIBBLE CHAIN

Where the journey continues

Each should have an interactive product preview.

SECTION 06 — SCRIBBLE

Headline:

Meet the Scribble.

Subheading:

How I think & create.

Explain:

A Scribble is more than a drawing or note.

It can bring together:

- Text
- Drawing
- Images
- Voice

- Diagrams
- Media
- Interactive elements

Visual:

Show ONE Scribble being built live.

Text

-

Drawing

-

Image

-

Voice

-

Diagram

-

Media

=

ONE EXPRESSION

Key Message:

One expression can contain many forms.

SECTION 07 — SHELF

Headline:

Meet the Shelf.

Subheading:

What I choose & explore.

Show a visually rich Shelf.

Possible categories:

- Books
- Culture
- Places

- Ideas
- Projects
- Interests
- Experiences
- Discoveries

Also show:

Create Your Own Shelf

Key Message:

Scribble shows the journey of thought.

Shelf shows the journey of choice.

The Shelf should NOT look like a boring category grid.

It should feel like an individual's evolving world.

SECTION 08 — SCRIBBLE + SHELF

Headline:

Two windows into the individual.

Visual:

SCRIBBLE

How I think & create

-

SHELF

What I choose & explore

A richer expression of the individual

Important:

Do NOT use the term:

Psychological Profile

Mindow works with what people intentionally express, create, choose and share.

SECTION 09 — MODE OF EXPRESSION

Headline:

Mode of Expression, Redefined.

Show an interactive sequence:

WRITE

→

DRAW

→

SPEAK

→

VISUALIZE

→

CREATE

→

EXPERIENCE

Message:

Expression isn't limited to words.

SECTION 10 — INTENT INTERFACE

Headline:

Meet the Intent Interface.

Show:

TEXT

•

SKETCH

•

IMAGE

•

VOICE

•

ACTIVITY

↓

ONE INTENT

DIFFERENT EXPERIENCES

Explain that people communicate intent through multiple forms.

Mindow brings those forms together inside an interactive Scribble.

AI helps organize and interpret expressed intent and context.

SECTION 11 — INTENT INTERACTIVE SCRIBBLE

Headline:

One Scribble. An entire learning experience.

Show an animated journey:

THOUGHT

IDEA

QUESTION

HYPOTHESIS

PROOF OF CONCEPT

EXPERIMENT

APPLICATION

REFLECTION

Key Message:

The idea isn't simply explained.

It is explored, tested, experienced and reflected upon.

This should be one of the strongest interactive demonstrations on the website.

SECTION 12 — EXPERIENTIAL LEARNING

Headline:

Turn curiosity into experience.

Visual journey:

CURIOSITY

↓

THOUGHT

↓

IDEA

↓

CREATE

↓

TEST

↓

EXPERIENCE

↓

REFLECT

↓

NEW CURIOSITY

Show that learning is not just:

Lesson → Assignment → Submission

Instead it becomes an evolving journey.

SECTION 13 — SCRIBBLE CHAIN

Headline:

Learning doesn't have to end with one Scribble.

Visual:

SCRIBBLE 01

→

SCRIBBLE 02

→

SCRIBBLE 03

→

SCRIBBLE 04

→

...

Message:

Curiosity becomes a continuous journey.

This should be visually represented as an evolving chain rather than a normal timeline.

SECTION 14 — MENTOR ↔ STUDENT

Headline:

Redefining the mentor–student interface.

Split screen:

MENTOR → STUDENT

Mentor expresses one learning intent through multiple mediums.

↓

Mindow helps transform the intent into different experiences.

STUDENT → MENTOR

Student expresses:

- Reasoning
- Questions
- Ideas
- Creations
- Curiosity

↓

Mentor gets richer visibility into the student's approach to an idea.

Key Message:

Mentors don't just see what students produce.

They can better understand how students approach an idea.

SECTION 15 — ONE INTENT. DIFFERENT EXPERIENCES.

Headline:

One intent. Different ways of experiencing it.

Example:

Mentor asks:

"Why does a butterfly change?"

One interactive Scribble.

Then show:

Student A → Visual Exploration

Student B → Observation

Student C → Drawing

Student D → Experiment

Student E → Research

Key Message:

Different minds can explore the same curiosity in different ways.

SECTION 16 — SOCIAL WALL

Headline:

Different minds. Different expressions. One learning environment.

Show controlled student environment.

Content examples:

- Art
- Experiments
- Ideas
- Stories
- Projects
- Unusual solutions
- Questions

Emotional message:

"I didn't think about it that way."

Important:

The Social Wall should NOT look like Instagram.

It should be:

- Learning-focused
- Controlled
- School-connected
- Moderated
- Perspective-driven

Not popularity-driven.

SECTION 17 — AI

Headline:

AI that helps understand expression — not define the child.

Explain:

Mindow uses AI to help:

- Organize information
- Connect ideas
- Interpret expressed context
- Identify expressed themes
- Generate learning pathways
- Support mentors

Important principle:

AI should assist understanding, not replace human judgment.

Do NOT show AI as creating a psychological/personality label for a child.

SECTION 18 — SAFETY

Headline:

Built for children. Designed around safety.

Show:

- School-connected access
- Role-based permissions
- Moderated community
- Parental/guardian controls where applicable
- Privacy-conscious data practices

- No targeted advertising
- Responsible AI principles

NEP positioning:

Designed to support NEP-aligned experiential, holistic and competency-oriented learning.

IMPORTANT:

Do NOT write:

"NEP Compliant"

unless formally verified.

SECTION 19 — MINDOW LEARNING LOOP

Create a large circular interactive visual.

CURIOSITY

EXPRESSION

INTENT

AI UNDERSTANDING

EXPERIENCE

REFLECTION

GROWTH

NEW CURIOSITY

Centre:

MINDOW

This should become one of the signature visual elements of the website.

SECTION 20 — BIGGER VISION

Headline:

What if the digital identity of the future could show more than a face?

Show:

What I am curious about

-

What I create

-

What I choose

-

What I experience

-

What I learn

-

How my ideas evolve

Then:

**From displaying the face
to displaying the mind.**

SECTION 21 — FINAL CTA

Headline:

**Every mind is different.
Why should expression be the same?**

Brand:

MINDOW

CURIOSITY. EXPRESSION. EXPERIENCE.

Secondary:

Understand. Empower. Grow.

CTA BUTTONS:

Explore Mindow

For Schools

Experience a Scribble

5. FOOTER

Column 1 — MINDOW

Mindow

Curiosity. Expression. Experience.

Column 2 — EXPLORE

- Why Mindow
 - How It Works
 - Scribble
 - Shelf
 - Scribble Chain
 - Intent Interface
 - Experiential Learning
-

Column 3 — FOR SCHOOLS

- Schools
 - Teachers & Mentors
 - Student Experience
 - Safety
 - Responsible AI
 - NEP-Aligned Learning
-

Column 4 — COMPANY

- About Mindow
 - Vision
 - Insights
 - Contact
-

Column 5 — LEGAL

- Privacy
- Terms

- Child Safety
 - Responsible AI
 - Data Practices
-

6. DESIGN LANGUAGE

The website must NOT look like a typical EdTech website.

Avoid:

- School dashboard aesthetics
- Excessive blue corporate UI
- Marks / grades / scores as primary visuals
- Tables
- Assignment dashboards
- Generic AI robot imagery
- Stock photos of classrooms
- Generic children-with-laptops imagery
- Excessive cards and grids

Prefer:

- Interactive product demonstrations
 - Fluid animations
 - Thought → expression transitions
 - Scribble interactions
 - Visual storytelling
 - Dynamic typography
 - Human creativity
 - Abstract intelligence
 - Curiosity-driven visuals
 - Layered interfaces
 - Experimental layouts
 - Premium futuristic design
-

7. MOST IMPORTANT INTERACTIVE DEMOS

These should receive the highest design priority.

Priority 1

Scribble

User should visually understand what a Scribble is within seconds.

Priority 2

Shelf

Show how someone's interests and choices create an evolving identity.

Priority 3

Intent Interactive Scribble

Show:

Thought → Idea → Question → Experiment → Experience → Reflection

Priority 4

Scribble Chain

Show how one curiosity creates another.

Priority 5

Mentor → Student

One intent → different experiences.

Priority 6

Student → Mentor

Student expression → richer visibility.

Priority 7

Social Wall

Different students → different perspectives.

Priority 8

Profile → Mind Identity

Show the future vision of digital identity.

8. CORE MESSAGE THE DESIGNER MUST UNDERSTAND

The entire website should communicate one simple idea:

Mindow is not trying to make every mind learn the same way.

Mindow is creating an environment where every mind can express curiosity, be understood, experience ideas and continue growing.

The fundamental loop is:

CURIOSITY

→

EXPRESSION

→

INTENT

→

AI UNDERSTANDING

→

EXPERIENCE

→

REFLECTION

→

GROWTH

→

NEW CURIOSITY

9. DESIGN PRIORITY

Do not design this website as:

Text → Image → Text → Image

Instead:

Concept → Interactive Demonstration → Explanation → Product Experience

The visitor should understand Mindow by **experiencing the concept**, not just reading about it.

The website itself should feel like a small demonstration of how Mindow works.

The website should make the visitor curious.

Then make them explore.

Then make them understand.

Then make them want to experience Mindow.
